February 2025

Code

React

```
import React from "react";
import "./youtube.css";

export default function YouTubeLoginUI() {
  return (
    <div className="container">
      <div className="login-card">
        <h1 className="title">Youtube</h1>

        <div className="camera-icon"> 📷 </div>

        <form className="form">
          <div className="input-group">
            <span> 👤 </span>
            <input type="text" placeholder="Your user name" />
          </div>

          <div className="input-group">
            <span> 🔒 </span>
            <input type="password" placeholder="Password" />
            <span className="eye"> 👁 </span>
          </div>

          <div className="options">
            <label>
              <input type="checkbox" /> Remember me
            </label>
          </div>
        </form>
      </div>
    </div>
  );
}
```

```

        </label>

        <span className="forgot">Forgot Password?</span>
    </div>

    <button className="login-btn">Log In</button>

    <p className="signup">
        Don't have an account? <span>Sign Up</span>
    </p>
</form>
</div>
</div>
);
}

```

CSS

```

*{
    margin:0;
